

BRIDENBAKER CREEK CULVERT REHABILITATION

The New York State Thruway

M.P. 225.45

Herkimer, New York

Owner/Client

NEW YORK STATE THRUWAY
AUTHORITY

Construction Cost

\$250,000

Scope

Construction Management

- Construction Inspection – Resident Engineer Services

Bryant Associates provided the Resident Engineer for the construction inspection of this double barreled box culvert for Bridenbaker Creek under the NYS Thruway. The construction included major repair to the interior and exterior of the culvert with cast-in-place concrete. Scour from a high intensity storm prompted on-site redesign of the culvert outlet protection by the resident engineer. Channel modification with erosion control measures were field designed and inspected.
